## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 70-71 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bronshtein U.S. 5,766,520. See column 2, line 56 through column 3, line 21 and Examples 1 and 2.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 46, 53-54, 57 and 63-71 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S.

Art Unit: 1744

Patent No. 6,306,345 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are of the same inventive concept, namely the preservation of a biological, which encompasses a virus, bacteria or other cell, during drying and storage with a given protectant mixture.

Claims 53-54, 57, 63-67 and 70-71 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,509,146 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are of the same inventive concept, namely the preservation of a biological which is a vaccine, during drying and storage with a given protectant mixture.

### ***Response to Arguments***

Applicant's arguments filed 2/9/2004 have been fully considered and are found to overcome the art rejection over Bronshtein for claims 46-69, however, the argued limitation of the requirement of methylated monosaccharides has not been set forth in claims 70 and 71, thus the art rejection thereof is maintained and made final.

Applicant's arguments regarding the double patenting rejection have also been fully considered and are not deemed persuasive regarding the broad independent claims of the instant application. Applicant's arguments are improperly directed to the body of the specifications of the applied patents, while double patenting rejections are based solely on the claimed subject matter and that subject matter is clearly overlapping in the recited patents and instant claims. These rejections are deemed proper, maintained and made final.

***Allowable Subject Matter***

Claims 47-52, 55-56 and 58-62 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the closest prior art of record fails to teach or suggest the claimed percentage ranges of the monosaccharide and disaccharide present per the total solute mass.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
